

What is Maths?

Maths is developing confidence and fluency with whole numbers, counting and place value. You will work with numerals, words and the four operations. Maths lessons will include using concrete resources, pictorial representations and moving to abstract representations.

Someone who studies maths is called a mathematician. Famous mathematicians include Sir Isaac Newton and Florence Nightingale.

I will be learning these skills in maths:

- To become fluent
- Reason mathematically
- Solve problems by applying maths
- Make connections across mathematical ideas
